

### Plenary session

#### Logistics Under Constraints: Solutions and Perspectives. From Anti-Crisis Agenda to Sustainable Development

*Topics for discussion:*

- International transport corridors. Alternative routes in the regulated environment
- Russia at the crossroads: how not to miss opportunities and take full advantage of them. Priority tasks
- State strategy to create conditions for the reorientation of part of transit cargo traffic
- Topical issues of developing and improving the efficiency of multimodal international transport corridors crossing the territory of the Russian Federation
- Cooperation for the efficient functioning of transport corridors
- Implementation of federal and regional programs for the development of the main transport infrastructure
- Interaction of ports and railway in the unstable environment
- How in practice do companies deal with shipping issues in a sanctioned environment

### Session

#### East-West. In Search of Mutual Interest

*Topics for discussion:*

- Alternative routes in a regulated environment
- Southeast Asia as a new centre of attraction
- Development of dialogue with new partners
- Principles and models for optimizing logistics systems
- Prerequisites and factors for the growth of cargo transportation
- Transportation of goods through the territories of the countries of Southeast Asia, the Caspian region
- Transport infrastructure development issues in the context of ensuring the economic interconnectedness of the East of Russia

### Session

#### Inland Water Transport: Development of The Inland Waterways Network

*Topics for discussion:*

- Modernization of inland waterways and ensuring the navigation safety
- Inland water transport development concept
- Prerequisites and factors for the growth of cargo transportation by inland waterways of Russia
- Infrastructural problems of the GDP. Technical condition of river ports
- Implementation of infrastructure projects

### Session

#### International Container Transportation - Development Potential

*Topics for discussion:*

- Current state and problems of the global container transportation system
- Prospects for container traffic along the International North-South Transport Corridor (INSTC), Western Europe - Western China highway, Amur Region, Azov-Black Sea basin routes
- Experience in monitoring "entrance/exit to/from the Russian Federation"
- Logistics optimization as a way to increase the efficiency of cargo traffic
- Trends in the development of the sea and land subsystems of the container cargo distribution system
- Port-oriented and port-centric logistics

- Development of container handling equipment
- Development of analysis, planning and management tools for container terminals
- Changing the role of forwarding in the container business
- Strategies and business processes aimed at increasing the profits of transport and logistics companies' clients in the container transportation market

#### Round table

#### Customs Logistics and Supply Chain Management

*Topics for discussion:*

- International cooperation. Interaction with the customs services of the European Union countries
- Measures to simplify customs administration and speed up customs operations in the current environment
- The role of information technologies in integration processes. Transition of operations with transit cargoes into electronic form
- Creation of secure supply chains: prospects for the authorized economic operator institution in the EAEU
- Issues of customs clearance and operation of checkpoints across the state border of the Russian Federation located in sea and river ports
- Development of information interaction between the FCS of Russia and the customs services of the EAEU countries with Russian Railways and other carriers

#### Session

#### Northern Sea Route: Strategic Interests of The State

*Topics for discussion:*

- Implementation of the Northern Sea Route Infrastructure Development Plan until 2035
- Northern Sea Route in the system of international transport corridors
- Development of port infrastructure in the Arctic
- Largest Arctic projects logistics
- Navigational and information support for navigation in the Arctic
- Digital Technologies to Improve the Efficiency of Navigation on the Northern Sea Route

#### Session

#### Digital Logistics Ecosystem

*Topics for discussion:*

- The role of state bodies in the formation of national ecosystems: how to digitize the transport and logistics sector while maintaining the national sovereignty of each country
- Issues of creating common standards for transport and logistics services
- Digital technologies and new sources of competitive advantages for companies in supply chain management
- Training and additional training of management personnel in the field of logistics for the mobility of companies in intersectoral markets
- Directions for increasing the level of profitability of customers based on the digital transformation of the transport and logistics companies' business

#### Session

**Assessment of the Current State, Problems and Prospects for the Development of Russian Seaports**

*Topics for discussion:*

- Implementation of infrastructure projects in the field of maritime transport within the framework of the updated complex modernization and expansion plan.
- Development of Russian seaports and topical issues of state regulation of the port industry
- Export of maritime transport services. Sea ports in international logistics routes.
- Development projects in Russia of port hubs of international importance. International port as a factor in the development of the region
- Equipment and technologies for ports: effective investments
- Conditions and sources of development of port industrial zones. Port regions as centres of economic development. Opportunities and constraints for the development of maritime transport hubs
- Full logistics port industrial zones
- Prospects for the inclusion of small ports in international shipping and the development of regular shipping lines
- Legal features of public-private partnership in the development of the port industry

**Session**

**International North-South Transport Corridor. Under Sanctions Pressure**

*Topics for discussion:*

- Updated transport and economic balances of the western and trans-Caspian routes International North-South Transport Corridor.
- The importance of the development of the International North-South Transport Corridor.
- Formation of logistics channels and accelerated supply chains in the new conditions on the routes of the International North-South Transport Corridor.
- Increasing the competitiveness of the International North-South Transport Corridor in the face of traditional routes declining efficiency
- International North-South Transport Corridor as a driver for the development of Russian regions.
- Ways to increase the economic attractiveness and competitiveness of the International North-South Transport Corridor and governmental actions to strengthen Russia's position in the Caspian region

**Session**

**Transit Transportation - Relevance, Development Prospects**

*Topics for discussion:*

- Transit monitoring
- Profits from transit for the Russian Federation
- Internal competition of transit with import/export in terms of loading the main and terminal infrastructure - growth points
- Interaction between railways and seaports and on establishing business cooperation in the field of multimodal transportation
- Development of railway transport routes in the reformatted Comprehensive plan for the infrastructure modernization and development
- Topical issues of information technologies development of the railway transport
- Measures to increase the transit potential of Russian railways
- Railway cars operation, repair and maintenance
- New information technologies aimed at improving the interaction between Russian Railways and seaport operators
- Development of railway approaches to the seaports of the North-Western Basin

**Session**

**Unmanned Vehicles and International Freight Forwarding**

*Topics for discussion:*

- Unmanned movement of goods across the state borders of states in the context of pandemic restrictions
- Intelligent checkpoints
- Intelligent transport systems
- Legal aspects of unmanned vehicles cross-border traffic

#### **Session**

#### **Digital Technologies at The Service of Seamless Transport Logistics**

*Topics for discussion:*

- Implementation in practice of the logistical principle "the information traffic is ahead of the traffic of goods"
- Mutual recognition of the results of customs control
- Increasing the capacity of checkpoints

#### **Session**

#### **e-CRM International Consignment Notes**

*Topics for discussion:*

- Preliminary results of the implementation of the e-CRM international consignment notes for road transport between the Russian Federation and the Republic of Belarus
- Expectations and results of the international pilot project implementation
